

## Focus group

We are seeking to understand how key stakeholders evaluate and assess quality in early years settings

### **Research aim**

We will be asking you to compare the Ofsted inspection process and other quality assessment tools such as ECERS or your own internal QA tools

### **Research questions**

- How you perceive quality and how much this is aligned with the definitions of quality underlying the different quality measures
- How useful are the different measures as a tool for improving quality and for informing stakeholders about quality
